Boylston Medical Prize Dissertations for the Years 1819 and 1821; Experiments and Observations on the Communication Between the Stomach and the Urinary Organs, and on the Propriety of Administering Medicine by Injection Into

By Enoch Hale

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1821 Excerpt: . one, and which had taken up 41 grains, was now slowly evaporated in a glass vessel over a lamp. Beautiful cubic crystals soon appeared; the whole was evaporated to dryness in order to examine this salt, which with the usual tests, unnecessary here to repeat, was found to be wholly muriat of soda or common salt. The last or third solution, which consisted of 25 grains, taken up by the distilled vinegar, was next examined to discover whether it consisted wholly or in part of carbonat of lime, or wholly or in part of carbonat of magnesia; for this purpose it was evaporated slowly till a viscid mass was obtained, which could not be brought to crystallize, and which was deliquescent. This residuum not only showed the properties of acetat of lime, but also of magnesia; it was accordingly converted into an aqueous solution, and...

Reviews

A fresh e book with an all new viewpoint. It can be rally exciting throgh studying period of time. You will like the way the writer write this publication.
