In the process of creating medical terminology, certain rules of language apply. These rules are part of language mechanics called linguistics. So, when a term is developed, some logical process is applied. Decoding the medical term is an important process. Once experience is gained in the process of forming and decoding medical terminology, the process becomes easier. One approach involves breaking down the word by evaluating the meaning of the suffix first, then prefix, and finally the word root. This will generally produce a good result for the experienced health care professional. When in doubt, the result should be verified by a medical terminology dictionary. The process of learning any new language, such as medical terminology, is facilitated by learning basic rules. This item ships from La Vergne, TN. Paperback.
