No. 12 SOME NEW BYTHOSCOPID. E FROM BRITISH COLUMBIA AND THE SOUTHWEST. BY E. D. BALL, UTAH AGR. COLLEGE, LOGAN, UTAH. Every collection of western BythoscoPIDx that the author has examined has had a more or less heterogeneous assemblage of forms closely resembling *Idiocerut alternatus*. These have been somewhat indiscriminately divided between *alternatus*, *ramentosus* and several MS. names of Uhlers in classification, or not determined at all. At the time of publication of the key to this genus, the material at hand was not sufficient to warrant the descriptions of these forms, and they were omitted. Since then the author has paid special attention to the collecting of this group in Colorado, and has received a long series of specimens from the Pacific Coast, mainly from the collection of Mr. C. Livingstone. With this material it has been possible to...
