Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1839 edition. Excerpt: . . . on the manufacture of the metals; that from time immemorial she has been working at, and elaborating their primitive particles; that these particles issue forth, in the form of vapours and exhalations, to the very surface of the globe, through the rents, in the same manner as the sap rises and circulates through vegetables, by means of the vessels and fibres of which they are composed. Another effort to penetrate the mystery of metallic Lehman, *Abhandlung von den Metalmitteln und der Erzcugung der Metalle*. 1753, quoted by Werner. depositions, was that of Werner, who, in 1791, gave what he considered a New Theory of Mineral Veins, of which the principal points of novelty are, the application of the phenomena of intersections to determine the ages of veins, and the hypothesis of aqueous solution for the filling of the fissures. In proof that the fissures of veins were filled from above, Werner mentions the occurrence of rounded pebbles at the depth of 180 fathoms in the vein Elias in Danielstollen at Joachimsthal, and similar instances in the Stoll refier near Riegelsdorf in Hessia, and in Dauphin. His notion of the manner in which veins were filled, partakes of the errors which belong to all the Wernerian hypotheses of the origin of mineral masses. He says, -- The same precipitation which in the humid way formed the strata and beds of rocks (also the minerals contained in these rocks), furnished and produced the substance of...
